## AERIAL APPLICATION SOLUTIONS THAT WORK FOR YOUR BUSINESS

Vision Air Services is pleased to offer you our aerial application expertise. From the aerial application of herbicides to liquid fertilizers specific to your crop needs Vision Air has your operations covered.

Our aim is to effectively and efficiently cover more ground in less time with NO damage to your fields/ crops. Given your ever changing soil conditions, concern over fields too wet to drive on or a time sensitive measure imperative to your crops yield and your livelihood; the unique characteristics of the helicopter can achieve these goals seamlessly.

If your aim is to minimize time and your energy that comes with ground based spraying/ fertilizing equipment that you have to maintain and operate. Why not see what the aerial advantage can do for your productivity? It might be hard to believe, but at the end of the day, our very efficient machine in the hands of our knowledgeable team might just save you a bundle of money... and more importantly, leave you with more bundles of crops to bring to your perspective markets. Ask us for more information on how we can help your operations.
